

# VELOREX UNIVERSAL

Luxury sidecar

Designed to fit most bikes

# VELOREX UNIVERSAL

Here's your opportunity to add a luxury sidecar to the bike of your choice\* without the problem of special fittings or modifications. The new Velorex Universal unit is engineered to fit simply and easily to a wide range of machines to give you instant touring or family transport. And luxury transport at that, with plenty of luggage space and complete with tonneau cover and hood.

For learner motorcyclists too the Velorex Universal gives the opportunity to ride a large capacity machine with a provisional licence—and there's only Part 2 of the new two part test to take. You'll probably find your insurance premium is lower than for a solo machine as well; combinations qualify for close on a 50% reduction in premiums.

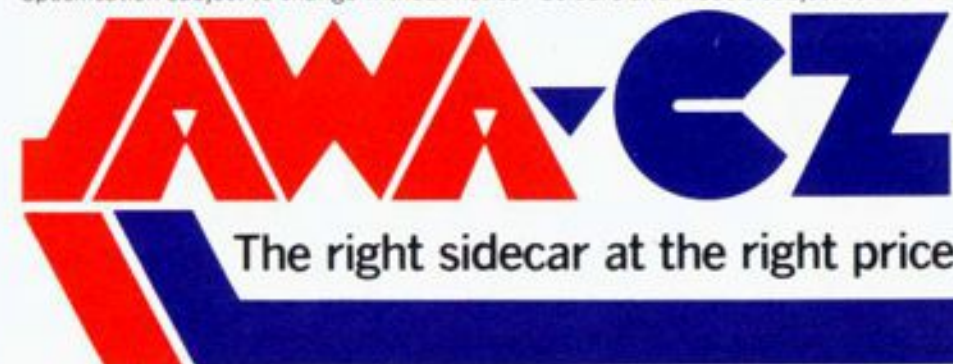

Available in metallic silver with black anti-drum finish on the under side as illustrated the Velorex Universal has a big 18" road wheel, with drum brake that your dealer can connect to the footbrake of the motorcycle, plus lever suspension with a coil spring damper unit for less tyre wear and superb handling.

\*A limited number of motorcycles are not suitable for use with the Velorex Universal. You are recommended to check with the manufacturer of your motorcycle the suitability or otherwise of its use with a sidecar attached.
