## Jawa 350 Javelin

The winning 1978 combination. Designed and built in Britain exclusively for the Jawa 350 De Luxe, the bodied sidecar incorporates the most advanced technological chassis developments for improved stability, handling and passenger comfort. The sidecar is available only in red or black to complement either of the motorcycle colours and features metalastic suspension, 8" road wheel, trafficators and ample luggage space.

## Jawa 350 Javelin Super Jawa 350 Tradesman

This is the ultimate motorbike and sidecar. Built to the same technical specifications as the Javelin, the Super Javelin is fully carpeted, luxuriously upholstered, and carefully insulated, and has a luggage rack. We've added a stylish fairing to the Jawa 350 and both bike and sidecar have tinted windscreens. A waterproof hood is available for the sidecar.

All the economy of a motorbike, plus an incredible carrying load - that's the Tradesman. Ideal for campers, hobbyists, small businessmen and sportsmen, the 350 Tradesman is built to the same specifications as the Javelin sidecar. This means plenty of manoeuvrability, and stability, and the specially developed suspension allows your load to travel in complete safety.
